

Introducing 100% Tree Free, Carbon Neutral Paper

Our Goal

TreeZero is making a positive impact on the environment for future generations through the use of tree free, agro-fiber paper.

The Issue

According to the World Resources Institute, more than 80% of the Earth's natural forests have been destroyed causing a significant negative impact on the environment. Industry-leading companies and organizations are committed to reducing their carbon impact, ensuring sustainable consumption and stopping deforestation.

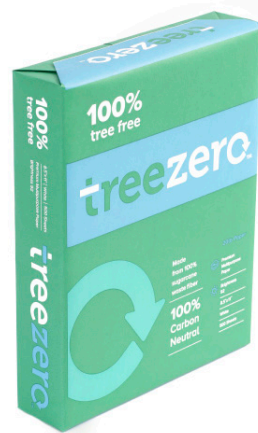

The Solution

TreeZero paper is a sustainable solution. TreeZero is the only premium 100% tree free, carbon neutral, multipurpose paper made from sugarcane waste fiber.

One pallet (40 boxes) of TreeZero paper saves 24 trees, while one pallet of 30% recycled paper saves just 7 trees.¹ It is completely recyclable within existing recycling systems.

TreeZero paper is available through major office supply distributors including Office Depot™/Office Max™, Ricoh Canada, Staples® and W.B. Mason. TreeZero paper can also be found online at Amazon.com or in store at FedEx Office™.

How is TreeZero Different?

1. TreeZero is made from 100% sugarcane waste fiber, a rapidly renewable fiber – typically burned or landfilled.
2. It is also the only tree free and carbon neutral paper.
3. The print quality of TreeZero paper surpasses regular recycled paper brands.²
